

One object in
the bin
dataset

```
graph LR; A[One object in the bin dataset] --> B[Second neural network]; B --> C[Neural network trained on the COCO dataset]; C --> A;
```

The diagram illustrates a process flow. On the left, a purple rounded rectangle contains the text 'One object in the bin dataset'. An arrow points from this rectangle to a light green rectangle on the right labeled 'Second neural network'. From the bottom of the green rectangle, an arrow points to a light orange rectangle labeled 'Neural network trained on the COCO dataset'. Finally, an arrow points from the bottom of the orange rectangle back to the purple rectangle, completing a loop.

Second neural
network

Neural network
trained on the
COCO dataset
